"The best institution I have ever seen."
Ammar AL-Thaqafi, course duration 22 weeks, intensive English

Everything is perfect, nothing more or less. The teacher is amazing and my English language has changed since I was here.

"Excellent experience and better than what I expected."
Mahdi Ali Busaleh, course duration, 12 weeks

In general, the classes, teachers, location, facilities and activities are good. What I liked more, for example, were that the classes were not big and no more than 7 people in each class. That helps students to understand easier and practice more. I think practicing is the most important thing in studying a language, so this exists at ILSP. The teachers are respectful and respect what I believe, and let students practice as much as possible.

Krakow’s monuments cover different periods in history, for instance the Cathedral and Royal Castle are the remains of Renaissance and Baroque architecture. Krakow is classified by GaWC as a global city with ranking of High sufficiency and considered as one of the Europe’s most beautiful cities.
Education system

Poland’s education system dates back to the Middle Ages. Jagiellon University, for example, was founded in the 14th century and today is one of the oldest universities in Europe. There are over 400 courses offered in English in Poland, many of them at an undergraduate level.

Poland’s medical schools, in particular, are drawing an increasing number of international students. Many international students who have been unable to get into a medical program in their home country choose instead to study medicine in Poland. Although these courses are taught in English, Polish speaking skills are likely to become necessary by the end of the program, when students begin consultations with patients.
Education system
